Hardworking, detail-oriented individual with great customer service, who can multitask, both independently and as a team, as well as being very committed to tasks given. Works on personal coding and design projects in his free time and is pursuing a part-time degree at SUSS.

Professional Experience

Feb 2023 - Sep 2024

Full Stack Developer – Ceesolution Pte. Ltd.

- Collaborate with product managers, developers, and stakeholders in the requirement-gathering phase, as well as with cross-functional teams for effective development and timely project completion to deliver high-quality software products.
- Test, deploy, and debug software programs and systems. Run performance tests and debug issues in existing software while maintaining data privacy practices.
- Design frontend and backend architectures, including user interface design and API design. Generate technical documentation, prototypes, and wireframes while keeping up to date with design trends and ensuring developed and delivered solutions are user-centred.

Aug 2021 – Feb 2023

Web Designer/Developer – SkipQoo

- Integrated systems such as ERP and API request for several businesses.
- Assisting in designing and implementing new features and functionality for marketing websites.
- Building user interfaces and ensuring high performance of websites.
- Maintaining quality service by establishing and enforcing organisation standards.
- Preserved marketing arms with reputable followings by producing deliverables at a consistent rate.

Dec 2018 – Apr 2020

Senior Crew - Nayuki

- Helped troubleshoot when POS systems are down.
- Trained and mentored new co-workers on SOPs.

- Organised and liaised with co-workers for their work schedules.
- Recommended and prepared drinks and deserts to customers.
- Conversed with customers in English, Mandarin, and Japanese in a warm, friendly way.

Aug 2017 – Dec 2018

Service Crew - Chicken Up

- Assisted with troubleshooting POS systems.
- Recommended and prepared drinks and deserts to customers.
- Served food and drinks to customers in a warm and friendly manner.
- Processed customers' orders and handled cashiering tasks.

Aug 2014 - Feb 2015

Intern - Agency for Science, Technology and Research

- Partook in the wearable technology project, helping in designing the GUI, as well as programming the Arduino-based flex sensors with C++.
- Assisted in equipment management, quality assurance, and regulatory affairs.
- Worked with the Project Manager & Technical Lead to perform experiments, and documentation.
